a reoccurring article

This section is dedicated to the introduction of our A.C. DePuydt family members.

Efrain Murillo
Sales Associate

The truth is out there... And our real life X-Files agent is out to find it!

Efrain Murillo has been a part of A.C. DePuydt for the last 15 years.

A member of our warehouse team, Efrain can be found working the will call counter, insuring product quality, splitting V-packing sets, and cutting gas-kets.

When he's not on the job, Efrain enjoys time with his wife and **(continued on p2)**

split V-coil specialists

(l to r) Gene Sr., Efrain, Gene Jr., & Arnold cutting and assembling a large split V-coil packing set

By Darren Held

When you need large split V-coil packing sets, look no further than your phone. One call to (800)64-SEALS, will put you through to one of the largest stocking warehouses of Garlock style 432 and 435 V-coil.

We can custom split your

V-coil packing set and ship it the same day!

Delivery is important, but so is price, that is why we stock so much V-coil.

Our buying power allows us to offer you great prices on quality material and superior service.

Since 1993, A.C. DePuydt **(continued on p2)**

custom seal kits: revisited

By Darren Held

For the last couple of years we've been talking about the advantages of custom seal kits; the ease of ordering, the price savings, the quick delivery.

Custom seal kits really do save time and money.

Your custom kit number is logged in our computer with the exact kit make-up, making ordering a snap and reducing the chance of any ordering error.

Each kit is priced as a whole

unit, eliminating worry about making line minimums on low cost components.

Fast deliveries are always a must, that's why most kits will ship same day (excluding kits with custom, non-stock components).

Reselling your kits? Customized identification stickers for resale purpose are available for your convenience.

We've logged thousands of custom seal kits over the last four years, and we continue

sample custom kit

to add new kits every week. Our custom seal kits are used in a variety of applications, for a variety of customers.

Satisfied customers that use our custom kits include:

- The City of Los Angeles**
- The City of Santa Monica**
- The City of Whittier**
- Department of Water & Power**

Whatever your application, we can make a seal kit to make your life easier!

For more information about our custom seal kits, contact any one of our sales associates @ (800)64-SEALS.

V-coil continued

(continued from p1)

has been a four time recipient of Garlock's Regional Award for Outstanding Distributor. And we look forward to the opportunity to continue that tradition into the next millennium.

Sets are available in 1/4, 5/16, 3/8, 7/16, 1/2, 9/16, 5/8, 3/4, 7/8, 1, and 1-1/8 inch cross section (other cross sections available in non-Garlock material). If you need a BIG set we can cut it. Up to 100 inch ID, no problem!

Call today for a quote, and see how we can help you get the split V-coil set you need.

new procedure

By Darren Held

Will Call Cash customers are going to notice a change in the way we run our procedure at the Will Call counter. Our Will Call staff members will no longer be accepting, cash, check or credit card payment at the counter. They will still be there to service all your needs; identifying and measuring parts, and filling orders.

All cash, check and credit card payments will now be made at the Cashier window inside the front office.

The outcome of this new procedure will be faster service at the Will Call counter.

If you have any comments or questions about this new procedure, please feel free to call Darren Held at (800)64-SEALS.

Thank you for your continued patronage.

product info: rope packing

By Darren Held

If you deal with repairing pumps and rotary shafts, then you know how important rope packing is to your job. Nobody understands your packing needs better than A.C.DePuydt, Inc.

Remember, we do more than just hydraulic seals.

The fact is that we stock over 12 different sizes of general service graphite and industrial Teflon coated rope packing, ranging from 1/8 to 1in

and lubricants combine to create rope packings that are able to deal with varying temperature, pressure, and shaft speed. These packings are made to withstand caustic chemicals, gases, oils, steam and other environments that are common in chemical factories, pulp and paper mills, food manufacturing, water reclamation, and any other application where rope packing is needed.

we've got the rope packing you need!

diameter.

Most sizes come on three different spool sizes, one pound, five pound and ten pound.

Our general service graphite (365-) and Teflon (841-) rope packings are used in various pump, valve, rotary and reciprocating shaft applications.

We also stock a variety of special rope packings, including styles with Kevlar corners for high friction applications and FDA approved packing for food manufacturing.

Styles for almost any operating condition are available from our factories. Most specialized rope packings are available from the factory in as few as one to two days*.

A variety of different fibers,

Most packings are rated at about 300 to 500psi for pressure, with some metallic packings handling pressures up to 1000psi.

Some styles are made to handle temperatures up to 1200°F and pressures in excess of 4500psi!

Call us at (800)64-SEALS, with all the information about your application, and let us help you find the rope packing best suited for your application.

*With UPS One Day or UPS Two Day service.
